

Patient-observed.

We are obsessed with our patients and their well-being. This obsession guides everything we do – our use of medical-grade components, testing our formulations four times throughout processing, and our commitment to dose.

Through the power of dose and our obsession with our patients' health, **dosist**[™] is changing the conversation around cannabis and helping people find a new, safe, and natural therapeutic tool.

Starting a new conversation.

From consumers to press, we are starting a new conversation, focusing on cannabis as a critical wellness tool. And, we're making progress. Two months after we launched, *Time* magazine named **dosist**™ as one of the best inventions of 2016. Since then, we've been globally recognized for disrupting the wellness category and paving a new path forward for cannabis – most recently **dosist**™ was named by Fast Company as one of 2018's ten most innovative health companies.
